

In February and March 2004 CABE Education will be holding a series of six regional networking seminars, in partnership with architecture centres across England. The aim is to provide inspiration and an exchange of information about best practice and the potential of built environment education. All seminars will be tailored to events on the ground in the region and are aimed primarily at teachers and other educators. The events will combine keynote speakers and practical workshops. There will also be an opportunity for the architecture centres and other local organisations to show what they have to offer, and for teachers to pick up tips and share ideas. Please see below for further information and contact details.

Yorkshire & Humber:

Good Design in Schools: The role that schools can play in the planning and design of their spaces.
